Support your
clinical teams by reducing

- Nurse triage time
- Number of faxes
  from the pharmacy
- Prescriber PA efforts
- Callbacks / clarifications on
  scripts sent to the pharmacy

A clearer view into patient data

Access to the patient
information your teams need
to provide the best clinical
decision support, resulting
in better outcomes
and lower costs

Prescription data
including first fills, refills,
and abandonment
fed back into Epic for
outcomes reporting.

Unlock prescription
data to improve quality
measures including
value-based agreements
(VBA), HEDIS scores,
and STAR ratings

We'd love
to show your more!
